

ABSTRACT

A drug product which can maximize the effect of a
cholestanol glycoside useful as an anticancer agent. The
present invention provides a liposomal composition containing
5 a glycoside exhibiting antitumor activity, a phospholipid,
and a positive-charge-providing substance; the glycoside
being composed of GlcNAc-Gal-, GlcNAc-Gal-Glc-, Fuc-Gal-,
Gal-Glc-, or Gal- as a sugar moiety, and a hydrophobic
compound capable of forming a liposome.
